

UrBin Grower™

Flexible raised Bed / Organic Growing System

Patent Pending

Available Colors:

WHY THE URBIN GROWER™?

The UrBin Grower provides endless organic vegetables by facilitating growth through a mixture of the Square Foot Gardening method, all natural soil amendments, and a self-watering reservoir. Simply mix in the optional soil amendments with your soil, and plant your vegetables!

PERFECT FOR PEOPLE WHO...

- ✓ Garden
- ✓ Recycle
- ✓ Eat organic vegetables
- ✓ Live in an Urban Environment

THE EASY WAY TO START GROWING YOUR OWN FRESH ORGANIC VEGETABLES

Optional Soil Amendment package shown.

Helping you lead a _____
Healthy Organic Lifestyle

Control the quality of your food!

- **EAT LOCAL**
From your back porch or yard
- **REDUCE YOUR CARBON FOOTPRINT**
Don't import food to your community, grow it at home!

Optional 100% Organic Soil Amendments With Trace Minerals

Many agricultural lands are depleted of minerals, which are necessary for good health

UrBin Grower™

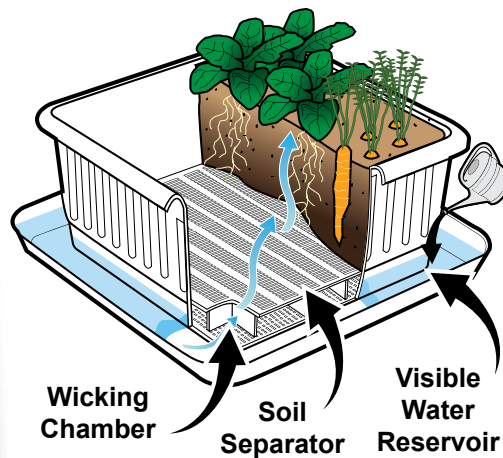

Flexible raised Bed / Organic Growing System

HOW DOES IT WORK?

The UrBin Grower provides endless organic vegetables by facilitating growth through a mixture of the Square Foot Gardening method, optional all natural soil amendments, and a patent pending self-watering reservoir design. Simply mix in the amendments with your soil, plant your vegetables, and wait until the roots are long enough to dip into the reservoir. You'll never have to worry about over or under watering again!

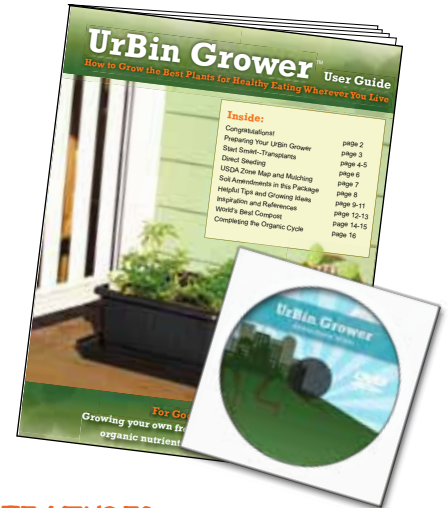

"All the vegetables I've tried have grown better in self watering containers than in traditional containers. Many actually grew better than in the earth garden"

-Edward C. Smith, Author
The Vegetable Gardener's Container Bible
